PROFESSIONAL SUMMARY

Computer Science (Software Engineering) graduate with experience in full-stack web development, business process automation, and AI-assisted software evaluation. Skilled in JavaScript, TypeScript, React, Vue.js, Laravel, SQL, and RESTful API development, with hands-on experience building web applications and workflow automations using Zapier and other business automation platforms. Experienced in troubleshooting technical issues, translating business requirements into software solutions, and using AI coding tools to improve development productivity and code quality.

EDUCATION

Universiti Teknologi Malaysia, UTM - CGPA: 3.99

October 2022 - July 2026

Bachelor of Computer Science (Software Engineering) with Honours

Dean's List (All semesters)

WORK EXPERIENCE

AI Coding Trainer (Freelance) | DataAnnotation

March 2026 – Present

- Evaluated AI-generated code and technical responses for correctness, efficiency, and adherence to software engineering best practices.
- Designed and applied evaluation criteria to assess AI-generated solutions against coding requirements, expected behaviour, and quality standards.
- Tested AI models using programming tasks, codebases, and debugging scenarios to identify logical, algorithmic, and code-quality issues across multiple programming languages.
- Provided detailed technical feedback to support AI model improvement and response quality

Digitalization Intern | Verdant Solar Sdn Bhd

September 2025 – March 2026

- Designed, implemented, and maintained workflow automations using Monday.com, Zapier, and Respond.io, reducing manual processes and improving operational efficiency
- Troubleshoot and debugged failed automations and cross-system integrations, improving workflow reliability across multiple departments
- Developed centralized dashboards and KPI visualisations for over 100 employees, improving visibility into business performance
- Resolved over 50 internal technical support tickets with a success rate exceeding 90%, ensuring operational continuity across multiple departments
- Applied SDLC practices including requirements analysis, design, implementation, testing, and validation to deliver structured and maintainable solutions

RELEVANT PROJECTS

Workshop Management System for Vulcan Auto Service (Final Year Project)

Laravel • Vue.js • PostgreSQL • RESTful APIs • Supabase

- Designed and developed a full-stack business application using Laravel, Vue.js, and RESTful APIs to digitize operations for a multi-branch automotive workshop
- Implemented customer, vehicle, inventory, transaction, payment, reporting, and role-based access control modules
- Automated quotation generation, invoicing, receipt generation, and inventory stock tracking
- Integrated Google Sheets to streamline customer request import and management
- Awarded the Industry Choice Award for delivering an industry-oriented solution

Auto-Letter Administration System for Universitas Negeri Padang

React • TypeScript • FastAPI • PostgreSQL • Python

- Designed and developed a responsive full-stack web application using React, TypeScript, FastAPI, and PostgreSQL for university administrative letter management
- Built a dynamic form generation engine from Word (.docx) templates using placeholder parsing and configurable template schemas
- Implemented role-based authentication, request tracking, email notifications, and document lifecycle management
- Designed and implemented RESTful APIs following a modular backend architecture for document generation and request management

Java-based Food Ordering System

Java • SQL

- Designed and implemented a food ordering system using object-oriented programming concepts such as inheritance, polymorphism, and interfaces
- Created a menu-driven interface allowing users to browse, order, and review food items

Room Booking System for MJIT Faculty Building

PHP • SQL

- Served as Scrum Master, coordinating sprint planning and team collaboration while developing a web-based booking platform

Study Assistance System with Pomodoro Timer

HTML • CSS • JavaScript

- Developed a web-based Pomodoro timer with customizable intervals, session tracking, and responsive and motivational UI to promote productivity

EXTRACURRICULAR ACTIVITIES

Media and Communication

2023-2024

International Student Society of Indonesia UTM KL

- Led digital media initiatives and managed official correspondence and social media account
- Handled documentation and publication for society events

Treasurer

International Youth Potential Summit 2024

- Prepared financial reports and oversaw event budgeting
- Ensured transparency in expenditures and approvals

Secretary

2024-2025

International Student Society of Indonesia UTM KL

- Drafted and managed official correspondence
- Supported administrative coordination across society activities

Volunteer (Session Chair Substitute)

IEA/AIE 2026 International Conference

- Assisted conference operations and participant coordination
- Served as Session Chair substitute during technical sessions when required, ensuring smooth session management and adherence to conference schedules

TECHNICAL SKILLS

Languages:

JavaScript • TypeScript • Python • PHP • Java • SQL • C++

Frameworks & Libraries:

React • Vue.js • Laravel • FastAPI • Spring Boot

Databases:

PostgreSQL • MySQL • Firebase

Automation & AI:

Zapier • Monday.com • Copilot • Cursor

Software Engineering:

RESTful API Development • OOP • SDLC • Agile/Scrum • Software Testing

Tools:

Git • GitHub • Docker • Postman • VS Code

LANGUAGES

Indonesia

Native Proficiency

English

Full Professional Proficiency

Malay

Professional Working Proficiency
